CANDIDATE NAME			
CENTRE NUMBER		CANDIDATE NUMBER	
MATHEMATICS			9709/1
Paper 1 Pure Mathema	itics 1	Oct	tober/November 202
			1 hour 50 minute
You must answer on the	e question paper.		
You will need: List of f	ormulae (MF19)		

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].

This document has **20** pages. Blank pages are indicated.

The equation of a curve is such that $\frac{dy}{dx} = \frac{1}{(x-3)^2} + x$. It is given that the curve passes through the point (2, 7).
Find the equation of the curve. [4]

Find	ne rate at which the radius of the balloon is increasing when the radius is 10 cm.	[3]
		•••••
		•••••
		•••••

In the diagram, the lower curve has equation $y = \cos \theta$. The upper curve shows the result of applying a combination of transformations to $y = \cos \theta$.

Find, in terms of a cosine function, the equation of the upper curve.	[3]

)	Show that $r = 2R - 1$.	

It is now given that the 3rd term of the first progression is equal to the 2nd term of the second progression. **(b)** Express S in terms of a. [4]

The diagram shows a circle with centre A passing through the point B. A second circle has centre B and passes through A. The tangent at B to the first circle intersects the second circle at C and D.

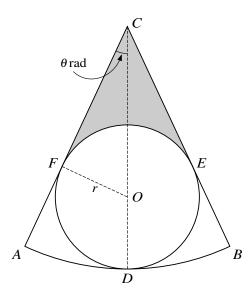

The coordinates of A are (-1, 4) and the coordinates of B are (3, 2).

(a)	Find the equation of the tangent <i>CBD</i> .	[2]
